

## INFORMATION FOR STALLHOLDERS

Save \$\$\$ by minimizing your packaging  
And help the community look after the environment.

### 1. Avoid unnecessary items

- Use serviettes instead of plates if possible
- Avoid plastic bags, drinking straws, plastic lids on coffee cups, single serve sugar packets, single serve tomato sauce sachets

*Single serve packaging can be hygienically replaced by having self-serving pump or tip containers. Rather than automatically placing covers on drink cups or providing a straw, wait for the customer to request one.*

### 2. Use packaging that is designed for short term durability (i.e. will break down easily)

- Paper, sugarcane or cornstarch will break down in compost or landfill

### 3. Use packaging that can be recycled (e.g. UNWAXED paper and PET numbers 1-6)

- Avoid non-recyclable packaging such as polystyrene cups and clams

For a range of suppliers check out the suppliers section on [www.ecobuy.org.au](http://www.ecobuy.org.au)  
(or see the 'Purchasing Environmentally Friendly' document)

### 4. Reuse items where possible

- Consider using crockery cups and plates and metal cutlery and glasses if possible.

### 5. Clean up regularly around your stall

Recycling bins will be located at several locations throughout the St Kilda Festival Precinct.

Each recycling station has a bin for

And

Stallholders will be provided with an additional service for

Boxes must be flattened, clean, dry and non-waxy.

*Please check with your Council representative to confirm where to place paper/cardboard for collection*

**PLEASE NOTE:**

- \*No trader may sell any products in glass on Festival Day.
- \*All traders wishing to sell drinks **MUST** purchase these from the St Kilda Festival Vending Manager.
